INTRODUCTION

AEREN ISMS™ is our Proprietary Online and a web based tool that would assist the students in filling up of application forms on the internet. Such tool will provide ease for uploading of several documents through a secured FTP. It will also provide assistance to students to track their status about the, Enrollment application, loan application, Fee due, loan installments due, overdue installments, fee and installments paid and to manage and organize history and documents submitted. This will help the student in generating various reports and alerts.

On the other hand, it will help our clients to monitor the entire International Student portfolio and collection at the push of the button. Our clients will be able to track the ongoing process on a real time basis. This will also assist our client to know about the due and overdue fee and installments timely to avoid potential delinquencies. This will help to organize and manage documents and information. Our clients can generate various reports to meet their needs. This will reduce the administrative workload and hence helping our clients to focus on core functions. It is an excellent tool to manage International Student Risk more efficiently and effectively.

OBJECT

The sole object of this Web Based Application is facilitating the process and assisting various users involved in the process

It helps in creating and maintaining a single point of entry that increases efficiency by eliminating redundant data and thus by reducing errors.

This application is structured in such a way so as to smoothen the functioning of the process, giving efficient and accurate output and thus reducing maintenance and operating costs overall.

PLATFORM

The platform for the working of this application is MS SQL. This software is being used in order to provide for robust database structure.

This software helps in serving the dual purpose, first one of providing a user interface in which data can be accessed and added by the user and second purpose of maintaining a competent database which can help in further serving various other purposes.

HOW IT WORKS

Student:
